DETAILED ACTION

1. Last OA mailed 3/06/07 is hereby incorporated by reference.

Response to Arguments

2. Applicant's arguments filed 5/23/07 have been fully considered but they are not persuasive.

Re Claims 1, 18, 24, Applicant fails to argue the Double patenting rejection.

Re Claims 1 and 18, Applicant argues the U.S. Patent Number 6,925,259 fails to teach, "a media access controller which schedule transmission to and receipt from a plurality of nodes at a plurality of time slots and wavelengths according to at least one reservation map."

However, examiner disagrees.

'259 patent teaches a MAC controller and also teaches reserving time slots and wavelength to plurality of nodes for transmission and reception. The claimed reservation map lacks any function. Reservation map reads on the reserved time slots and wavelength to the switches as shown in fig. 3.
